Subject index

Abnormal geometry of the distal radioulnar joint: MR findings 369
Accessory soleus muscle appearance, MRI of, in six patients and a review of the literature 525
Achilles tendon, ossification of: imaging abnormalities in 12 patients 127
Allograft, physiological resorption of, simulating recurrent giant cell tumor (*case report 826*) 139
Amyloidosis, $A\beta_2$-M, in long-term hemodialysis patients, annual evaluation of hip joints and hands for radiographic signs of 421
'Ancient' schwannoma (degenerated neurilemoma) (*case report 872*) 593
Aneurysmal bone cyst (*case report 830*) 157
Aneurysmal bone cyst component, fluid-filling giant cell tumor with (*case report 845*) 317
Aneurysmal bone cyst formation, fibro-osseous lesions of the face and skull with 15
Aneurysmal bone cyst of the patella (*case report 876*) 664
Angiomatosis, bacillary (*case report 865*) 569
Angiomatosis, bacillary, of the calcaneum (*case report 860*) 478
Announcements 42, 132, 216, 296, 342, 458
Annual evaluation of hip joints and hands for radiographic signs of $A\beta_2$-M-amyloidosis in long-term hemodialysis patients 421
Anteversion, femoral, in newborns, direct ultrasonographic measurement of 133
Anthropometric assessment: cortical bone mass in Nigerian children 49
Arthritic pathology of the rat knee, high-resolution MRI of 429
Avulsion fractures of the pelvis in children: a report of 32 fractures and their outcome 85

Bacillary angiomatosis (*case report 865*) 569
Bacillary angiomatosis of the calcaneum (*case report 860*) 478
Back pain, low, role of technetium-99m planar bone scanning in the evaluation of 91
Benign fatty tumours in children, MR imaging of: report of four cases and review of the literature 361
Benign hibernoma (*case report 842*) 306
Benign metastasizing giant cell tumor of bone (*case report 869*) 583
Benign soft tissue masses of the wrist and hand: MRI appearances 327
Blood, supply, bone marrow, in gadolinium-enhanced MRI 455
Bone marrow blood supply in gadolinium-enhanced magnetic resonance imaging 455
Bone marrow edema in osteoid osteoma (*letter*) 53
Bone mass, cortical, in Nigerian children: an anthropometric assessment 49
Bone scanning, technetium-99m planar, role of in the evaluation of low back pain 91
Book reviews 204, 454
Brucellosis, chronic – multifocal osteomyelitis, a manifestation of (*case report 875*) 660
Bursal fluid, isolated subacromial, on MRI of the shoulder in symptomatic patients: correlation with arthroscopic findings 529

Calcium pyrophosphate dihydrate crystal deposition disease, massive, involving the wrist joint (*case report 859*) 475
Carpal translocation, post-traumatic ulnar, rotatory palmar subluxation of the lunate in 103
Cartilage lesions and intracartilage degeneration in vitro, magnetization transfer contrast (MTC) and MTC-subtraction enhancement of 535
Cavernous hemangioma of soft tissue, fluid-fluid levels in 107
Cervical spine, nonvisualized lower, efficacy of limited CT in patients with blunt trauma 349
Cervical vertebra, fourth, congenital bilateral spondylolysis and spondylolisthesis of (*case report 868*) 580
Chemotherapy in Ewing's sarcoma of bone, classification of histopathologic changes following 501
Chemotherapy in Ewing's sarcoma of bone, monitoring the effect of, with MR imaging 493
Chemotherapy, MR relaxation times of normal tissue in the course of: a study in patients with bone sarcoma 181
Chondroblastoma, malignant fibrous histiocytoma of the capitate initially presenting as a (*case report 849*) 388
Chondrodysplasia, progressive pseudorheumatoid: a report of nine cases in three families 411
Chondromatosis, giant solitary synovial 23
Chondromatosis, synovial, simulating neoplastic degeneration of osteochondroma: findings on MRI and CT 99
Chondromyxoid fibroma, juxtacortical (periosteal) of the proximal tibia (*case report 837*) 237
Chondrosarcoma, intramuscular myxoid (*case report 829*) 153
Chondrosarcoma of the spinous process (*case report 879*) 677
Chronic sclerosing osteomyelitis of the mandible with long bone periostitis (*case report 834*) 225
Classification of histopathologic changes following chemotherapy in Ewing's sarcoma of bone 501
Clavicle, noninflammatory sclerosis of the sternal end of: a follow-up study and review of the literature 373
Clavicle, osteomyelitis of: clinical, radiologic and bacteriologic findings in ten patients 205
Clinical use of the simple 3D-calculation in scoliosis 43
Cobb angle measurement in scoliosis, variation in 517
Congenital bilateral spondylolysis and spondylolisthesis of the fourth cervical vertebra (*case report 868*) 580
Congenital or infantile (desmoid-type) fibromatosis, solitary, of the proximal end of the tibia (*case report 832*) 381
Congenital varicella syndrome (*case report 846*) 321
Contrast arthrography, value of, in assessing loosening of symptomatic uncemented total hip components 37
Coracoacromial arch: MR evaluation and correlation with rotator cuff pathology 641
Coraco-clavicular joint: normal variant in humans. A radiographic demonstration in the human and non-human primate 117
Cortical bone mass in Nigerian children: an anthropometric assessment 49
CPPD, massive, involving the wrist joint (*case report 859*) 475
Cruciate ganglion cysts, MR appearance of: a report of 16 cases 597
Cryotherapy, MR appearance of skeletal neoplasms following 121
CT, limited, efficacy of, for nonvisualized lower cervical spine in patients with blunt trauma 349
CT, value of, in the diagnosis of grating scapula 357
CT, vertebral pedicle diameter as determined by: inaccuracies observed by direct measurement of cadaveric lumbar spine 551
Cystic angiomatosis of bone with sclerotic changes mimicking osteoblastic metastases 247
Cystic angiomatosis, skeletal (*case report 841*) 303
Cysts, cruciate ganglion, MR appearance of: a report of 16 cases 597

Degeneration, intracartilage, and cartilage lesions in vitro, magnetization transfer contrast (MTC) and MTC-subtraction enhancement of 535
Densely calcifying synovial sarcoma of the hip metastatic to the lungs (*case report 878*) 673
Desmoid tumor, pericapsular, of the knee (*case report 818*) 217
Desmoplastic fibroma (juxtacortical

aggressive fibromatosis) of the forearm (*case report 847*) 560
Desmoplastic fibroma of bone: a report of 18 cases 283
Diagnosis of partial and complete rotator cuff tears using combined gradient echo and spin echo imaging 541
Diameter, vertebral pedicle, as determined by CT: inaccuracies observed by direct measurement of cadaveric lumbar spine 551
Diffuse idiopathic hyperostosis, vertebral pseudarthrosis associated with 353
Direct ultrasonographic measurement of femoral anteversion in newborns 133
DISH, vertebral pseudarthrosis associated with 353
Dual X-ray absorptiometry of the lumbar spine, interobserver variation in the detection of osteopenia by radiography and comparison with 195
Dysplasia, Schneckenbecken, possibly a new variant (*case report 870*) 586

Echinococcosis, primary, spinal of lumbosacral spine with destruction of left pedicles of L3–5 and extension of large paraspinal cystic mass into spinal canal (*case report 833*) 220
Edema accompanying benign and malignant bone tumors, MR imaging of 261
Edema, bone marrow, in osteoid osteoma (*letter*) 53
Efficacy of limited CT for nonvisualized lower cervical spine in patients with blunt trauma 349
Elastofibroma of the right shoulder causing brachial plexus impingement (*case report 839*) 459
Elbow fractures, pediatric: MRI evaluation 277
Elliptical, multicentric periosteal osteoid osteoma (*case report 864*) 565
Enchondromatosis, giant cell reparative granuloma arising in (*case report 877*) 669
Eosinophilic granuloma (*case report 854*) 648
Epiphysiolysis, Kallman's syndrome: hypogonadotropic hypogonadism with delayed closure of epiphyseal growth zones, resulting in, after trauma (*case report 848*) 385
Ewing's sarcoma of bone, classification of histopathologic changes following chemotherapy in 501
Ewing's sarcoma of bone, monitoring the effect of chemotherapy in, with MR imaging 493
Ewing's sarcoma, periosteal, of the tiba (*case report 819*) 59
Extraosseous extension of Gaucher cell deposits mimicking malignancy 253

Fatty tumors, benign, in children, MR imaging of: report of four cases and review of the literature 361
Femoral anteversion in newborns, direct ultrasonographic measurement of 133
Femur, proximal, MRI of occult fractures of 19
Fibromatosis, juxtacortical aggressive, (desmoplastic fibroma) of the forearm (*case report 847*) 560
Fibromatosis, solitary congenital or infantile (desmoid-type), of the proximal end of the tibia (*case report 832*) 381
Fibro-osseous lesions of the face and skull with aneurysmal bone cyst formation 15
Fibro-osseous pseudotumor of the scapula (*case report 823*) 73
Fibrosarcoma, infantile: radiological and clinical features 337
Finger positions used in the precision and partial power grips and the regional prevalence of osteoarthritis, relation between 449
First metatarsal pronation, hallux valgus and collapse of the medial longitudinal arch – a radiological correlation 191
Fluid-filling giant cell tumor with an aneurysmal bone cyst component (*case report 845*) 317
Fluid-fluid levels in cavernous hemangioma of soft tissue 107
Focal fibrocartilaginous dysplasia and tibia vara: a case report 333
Foot: hallux valgus, first metatarsal pronation and collapse of the medial longitudinal arch – a radiological correlation 191
Fracture, healed Segond: a characteristic residual bone excrescence 555
Fractures, avulsion, of the pelvis in children: a report of 32 fractures and their outcome 85
Fractures, occult, of the proximal femur, MRI of 19
Fractures, occult, role of MR imaging in detecting 439
Fractures, pediatric elbow: MRI evaluation 277

Ganglia, wrist, ultrasonographic evaluation of 201
Ganglion cysts, cruciate, MR appearance of: a report of 16 cases 597
Gaucher cell deposits, extraosseous extension of, mimicking malignancy 253
Giant cell reparative granuloma arising in enchondromatosis (*case report 877*) 669
Giant cell tumor (*case report 850*) 393
Giant cell tumor, fluid-filling, with an aneurysmal bone cyst component (*case report 845*) 317
Giant cell tumor, multicentric: report of five new cases 187
Giant cell tumor of bone, benign metastasizing (*case report 869*) 583
Giant cell tumor of bone, multiple (symmetrical lesions in both humeral heads) (*case report 862*) 487
Giant cell tumor, recurrent, physiological resorption of allograft simulating (*case report 826*) 139
Giant solitary synovial chondromatosis 23
Gout, isolated or dominant lesions of the patella in: a report of seven patients 113
Gradient echo and spin echo imaging, combined, diagnosis of partial and complete rotator cuff tears using 541
Granular cell tumor of striated muscle (*case report 820*) 63
Granuloma, giant cell reparative, arising in enchondromatosis (*case report 877*) 669

Hallux valgus, first metatarsal pronation and collapse of the medial longitudinal arch – a radiological correlation 191
Hand, MRI of pseudomalignant osseous tumor of 513
Handigodu disease: a radiological study. A new variety of spondyloepi(meta)physeal dysplasia of the autosomal dominant type 611
Healed Segond fracture: a characteristic residual bone excrescence 555
Help! 200
Help obtained 379
Hemangioma, cavernous, of soft tissue, fluid-fluid levels in 107
Hemangiomas, soft tissue: MR manifestations in 23 patients 621
Hemochromatosis arthropathy, MRI of 547
Hemodialysis, patients, long-term, annual evaluation of hip joints and hands for radiographic signs of $A\beta_2$-M-amyloidosis in 421
Hereditary symphalangism with carpal and tarsal fusions and deafness (*case report 857*) 468
Hibernoma, benign (*case report 842*) 306
Hibernoma of the left thigh (*case report 813*) 137
Hibernoma of the right gracilis muscle (*case report 840*) 301
High-resolution magnetic resonance imaging of arthritic pathology in the rat knee 429
Hip components, uncemented, value of contrast arthrography in assessing loosening of symptomatic 37
Hip joint in Indian adults, standards for ultrasonographic measurements of 111
Histopathologic changes following chemotherapy in Ewing's sarcoma of bone, classification of 501
Hyperostosis and osteoarthritis in patients surviving after tetanus 31

Imaging features of maxillary osteoblastoma and its malignant transformation 509
Infantile fibrosarcoma: radiological and clinical features 337
Injuries, acute physeal, MRI in 627
Interobserver variation in the detection of osteopenia by radiography and comparison with dual X-ray absorptiometry of the lumbar spine 195
Intramuscular myxoid chondrosarcoma (*case report 829*) 153

Intraosseous pneumatocyst of the clavicle (*case report 844*) 315
Isolated or dominant lesions of the patella in gout: a report of seven patients 113
Isolated subacromial bursal fluid on MRI of the shoulder in symptomatic patients: correlation with arthroscopic findings 529

Juxta-articular osteoid osteoma (*case report 831*) 161
Juxtacortical aggressive fibromatosis (desmoplastic fibroma) of the forearm (*case report 847*) 560
Juxtacortical (periosteal) chondromyxoid fibroma of the proximal tibia (*case report 837*) 237

Kallmann's syndrome: hypogonadotropic hypogonadism with delayed closure of epiphyseal growth zones, resulting in epiphysiolysis after trauma (*case report 848*) 385
Knee: healed Segond fracture: a characteristic residual bone excrescence 555
Knee: Meniscal ossicle: MRI appearance in 3 patients 637
Knee: MRI of tibial collateral ligament injury: comparison with clinical examination 521
Knee: O'Donoghue's triad: MRI evidence 633
Knee, value of coronal plane in MRI of internal derangement of 211

Leptomeningeal and spinal-pelvic osseous sarcoidosis (*case report 825*) 297
Letters to the editors 53
Ligament, posterior longitudinal, ossification of: a report of 9 cases in non-Oriental patients 601
Ligament, tibial collateral, injury, MRI of: comparison with clinical examination 521
Lipodystrophy, membranous (polycystic lipomembranous osteodysplasia) (*case report 867*) 577
Lipoma arborescens (villous lipomatous proliferation of the synovial membrane) (*case report 873*) 652
Lipoma, parosteal ossifying, of femur (*case report 821*) 67
Liposarcoma, myxoid, low-grade (*case report 851*) 396
Loosening of symptomatic uncemented total hip components, value of contrast arthrography in assessing 37
Low-grade myxoid liposarcoma (*case report 851*) 396
Lumbar spine, interobserver variation in the detection of osteopenia by radiography and comparison with dual X-ray absorptiometry of 195
Lumbar spine, vertebral pedicle diameter as determined by CT: inaccuracies observed by direct measurement of cadaveric 551
Lunate, rotatory palmar subluxation of, in post-traumatic ulnar carpal translocation 103
Lymphedema, primary, of the left lower extremity (*case report 861*) 483
Lymphoma, malignant large cell, of sacrum (*case report 836*) 232

Magnetic resonance imaging in acute physeal injuries 627
Magnetic resonance imaging of hemochromatosis arthropathy 547
Magnetic resonance imaging of occult fractures of the proximal femur 19
Magnetic resonance imaging of pseudomalignant osseous tumor of the hand 513
Magnetization transfer contrast (MTC) and MTC-subtraction enhancement of cartilage lesions and intracartilage degeneration in vitro 535
Malignancy, extraosseous extension of Gaucher cell deposits mimicking 253
Malignant fibrous histiocytoma of soft tissue, MRI of: analysis of 13 cases with pathologic correlation 271
Malignant fibrous histiocytoma of the capitate initially presenting as a chondroblastoma (*case report 849*) 388
Malignant fibrous histiocytoma of the femur arising in melorheostosis (*case report 843*) 310
Malignant large cell lymphoma of sacrum (*case report 836*) 232
Malignant transformation, imaging features of maxillary osteoblastoma and its 509
Mandible, chronic sclerosing osteomyelitis of, with long bone periostitis (*case report 834*) 225
Marrow, pelvic, in adults 343
Massive calcium pyrophosphate dihydrate crystal deposition disease involving the wrist joint (*case report 859*) 475
Maxillary osteoblastoma and its malignant transformation, imaging features of 509
Measurement, Cobb angle in scoliosis, variation in 517
Measurement, direct, of cadaveric lumbar spine: vertebral pedicle diameter as determined by CT, inaccuracies observed by 551
Medial longitudinal arch, collapse of, hallux valgus and first metatarsal pronation – a radiological correlation 191
Melorheostosis, malignant fibrous histiocytoma of the femur arising in (*case report 843*) 310
Membranous lipodystrophy (polycystic lipomembranous osteodysplasia) (*case report 867*) 577
Meningioma metastatic to the spine (*case report 853*) 405
Meniscal ossicle: MR imaging appearance in 3 patients 637
Meniscal ossification. I. Human 167
Meniscal ossification. II. The normal pattern in the tiger knee 173
Metastases, osteoblastic, cystic angiomatosis of bone with sclerotic changes mimicking 247
Metastatic meningioma to the spine (*case report 853*) 405
Miliary osteosarcomatosis (*case report 827*) 143
Monitoring the effect of chemotherapy in Ewing's sarcoma of bone with MR imaging 493
Monostotic Paget's disease of the hand (fifth metacarpal) (*case report 806*) 55
MR appearance of cruciate ganglion cysts: a report of 16 cases 597
MR appearance of skeletal neoplasms following cryotherapy 121
MR evaluation of coracoacromial arch and correlation with rotator cuff pathology 641
MR findings: abnormal geometry of the distal radioulnar joint 369
MR imaging: its role in detecting occult fractures 439
MR imaging, monitoring the effect of chemotherapy in Ewing's sarcoma of bone with 493
MR imaging, musculoskeletal: turbo (fast) spin-echo versus conventional spin-echo and gradient-echo imaging at 0.5 tesla 607
MR imaging of benign fatty tumors in children: report of four cases and review of the literature 361
MR imaging of edema accompanying benign and malignant bone tumors 261
MR imaging of the accessory soleus muscle appearance in six patients and a review of the literature 525
MR imaging of tibial collateral ligament injury: comparison with clinical examination 521
MR manifestations of soft tissue hemangiomas in 23 patients 621
MR relaxation times of normal tissue in the course of chemotherapy: a study in patients with bone sarcoma 181
MR signal abnormalities, subchondral, correlation of with histopathologic and radiographic features, in osteoarthritis of the knee 445
MRI: diagnosis of partial and complete rotator cuff tears using combined gradient echo and spin echo imaging 541
MRI appearance in 3 patients: meniscal ossicle 637
MRI appearances of benign soft tissues masses of the wrist and hand 327
MRI, bone marrow blood supply in gadolinium-enhanced 455
MRI evaluation: pediatric elbow fractures 277
MRI evidence of O'Donoghue's triad 633
MRI, high-resolution, of arthritic pathology in the rat knee 429
MRI in acute physeal injuries 627
MRI of internal derangement of the knee, value of coronal plain in 211
MRI of malignant fibrous histiocytoma of soft tissue: analysis of 13 cases with pathologic correlation 271
MRI of pseudomalignant osseous tumor of the hand 513

MRI of septic sacroiliitis 289
MRI of the shoulder, isolated subacromial bursal fluid in symptomatic patients on: correlation with arthroscopic findings 529
MTC (magnetization transfer contrast) and MTC-subtraction enhancement of cartilage lesions and intracartilage degeneration in vitro 535
Multicentric giant cell tumor: report of five new cases 187
Multifocal osteoid osteoma in a 2.5-year-old child (*case report 856*) 465
Multifocal osteomyelitis – a manifestation of chronic brucellosis (*case report 875*) 660
Multiple giant cell tumor of bone (symmetrical lesions in both humeral heads) (*case report 862*) 487
Muscle appearance, accessory soleus, MRI of in six patients and a review of the literature 525
Muscle, pseudotumor of, associated with necrotizing vasculitis of medium- and small-sized arteries and chronic myositis (*case report 866*) 572
Muscle, striated, granular cell tumor of (*case report 820*) 63
Muscular sarcoidosis, solitary: CT, MRI and scintigraphic characteristics 293
Musculoskeletal MR imaging: turbo (fast) spin-echo versus conventional spin-echo and gradient-echo imaging at 0.5 tesla 607
Myxoid chondrosarcoma, intramuscular (*case report 829*) 153
Myxoid liposarcoma, low-grade (*case report 851*) 396

Necrotizing vasculitis of medium- and small-sized arteries and chronic myositis, pseudotumor of the muscle associated with (*case report 866*) 572
Neoplasms, skeletal, MR appearance of, following cryotherapy 121
Neoplastic degeneration of osteochondroma, synovial chondromatosis simulating: findings on MRI and CT 99
Neurilemoma, degenerated ('ancient' schwannoma) (*case report 872*) 593
Neurofibroma, plexiform, of the tibial nerve invading the medial and lateral gastrocnemius muscles and plantaris muscle (*case report 828*) 149
Noninflammatory sclerosis of the sternal end of the clavicle: a follow-up study and review of the literature 373
Normal tissue, MR relaxation times of, in the course of chemotherapy: a study in patients with bone sarcoma 181
Normal variant in humans: coraco-clavicular joint. A radiographic demonstration in the human and non-human primate 117

Obituary 336, 557
Occult fractures of the proximal femur, MRI of 19
Occult fractures, role of MR imaging in detecting 439
O'Donoghue's triad: magnetic resonance imaging evidence 633
OPLL: a report of 9 cases in non-Oriental patients 601
Ossification and pseudoepiphysis formation in the 'nonepiphyseal' end of bones of the hands and feet 3
Ossification, meniscal. I. Human 167
Ossification, meniscal. II. The normal pattern in the tiger knee 173
Ossification of the Achilles tendon: imaging abnormalities in 12 patients 127
Ossification of the posterior longitudinal ligament: a report of 9 cases in non-Oriental patients 601
Osteoarthritis, and hyperostosis, in patients surviving after tetanus 31
Osteoarthritis of the knee: correlation of subchondral MR signal abnormalities with histopathologic and radiographic features 445
Osteoarthritis, relation between the finger positions used in the precision and partial power grips and the regional prevalence of 449
Osteoblastic metastases, cystic angiomatosis of bone with sclerotic changes mimicking 247
Osteoblastoma, maxillary, and its malignant transformation, imaging features of 509
Osteoblastoma, supraorbital (*case report 874*) 656
Osteochondroma causing peroneal palsy – imaging evaluation (*case report 822*) 71
Osteochondroma, synovial chondromatosis simulating neoplastic degeneration of: findings on MRI and CT 99
Osteoid osteoma, bone marrow edema in (*letter*) 53
Osteoid osteoma (*case report 838*) 241
Osteoid osteoma, elliptical, multicentric, periosteal (*case report 864*) 565
Osteoid osteoma, juxta-articular (*case report 831*) 161
Osteoid osteoma, multifocal, in a 2.5-year-old child (*case report 856*) 465
Osteomyelitis, chronic sclerosing, of the mandible with long bone periostitis (*case report 834*) 225
Osteomyelitis, multifocal – a manifestation of chronic brucellosis (*case report 875*) 660
Osteomyelitis of the clavicle: clinical, radiologic and bacteriologic findings in ten patients 205
Osteopenia, interobserver variation in the detection of, by radiography and comparison with dual X-ray absorptiometry of the lumbar spine 195
Osteosarcoma, parosteal, involving the left radius (*case report 835*) 229
Osteosarcoma, periosteal, of femur (*case report 852*) 401
Osteosarcoma, postradiation, of the patella (*case report 858*) 471
Osteosarcomatosis, miliary (*case report 827*) 143
Paget's disease, monostotic, of the hand (fifth metacarpal) (*case report 806*) 55
Paget's disease of bone, unusual radiological features in 257
Parosteal ossifying lipoma of femur (*case report 821*) 67
Parosteal osteosarcoma involving the left radius (*case report 835*) 229
Patella, isolated or dominant lesions of, in gout: a report of seven patients 113
Pediatric elbow fractures: MRI evaluation 277
Pelvic marrow in adults 343
Pelvis, avulsion fractures of, in children: a report of 32 fractures and their outcome 85
Pericapsular desmoid tumor of the knee (*case report 818*) 217
Periosteal Ewing's sarcoma of the tibia (*case report 819*) 59
Periosteal osteoid osteoma, elliptical, multicentric (*case report 864*) 565
Periosteal osteosarcoma of femur (*case report 852*) 401
Physeal injuries, acute, MRI in 627
Physiological resorption of allograft simulating recurrent giant cell tumor (*case report 826*) 139
Plexiform neurofibroma of the tibial nerve invading the medial and lateral gastrocnemius muscles and plantaris muscle (*case report 828*) 149
Pneumatocyst, intraosseous, of the clavicle (*case report 844*) 315
Polycystic lipomembranous osteodysplasia (membranous lipodystrophy) (*case report 867*) 577
Posterior longitudinal ligament, ossification of: a report of 9 cases in non-Oriental patients 601
Postradiation osteosarcoma of the patella (*case report 858*) 471
Post-traumatic ulnar carpal translocation, rotatory palmar subluxation of the lunate in 103
Primary lymphedema of the left lower extremity (*case report 861*) 483
Primary spinal echinococcosis of lumbosacral spine with destruction of left pedicles of L3–5 and extension of large paraspinal cystic mass into spinal canal (*case report 833*) 220
Progressive pseudorheumatoid chondrodysplasia: a report of nine cases in three families 411
Pseudarthrosis, vertebral, associated with diffuse idiopathic skeletal hyperostosis 353
Pseudoepiphysis formation and ossification in the 'nonepiphyseal' end of bones of the hands and feet 3
Pseudomalignant osseous tumor of the hand, MRI of 513
Pseudotumor, fibro-osseous, of the scapula (*case report 823*) 73
Pseudotumor of the muscle associated with necrotizing vasculitis of medium- and small-sized arteries and chronic myositis (*case report 866*) 572

Radioulnar joint, distal, abnormal geometry of: MR findings 369

Relation between the finger positions used in the precision and partial power grips and the regional prevalence of osteoarthritis 449
Role of technetium-99m planar bone scanning in the evaluation of low back pain 91
Rotator cuff pathology, MR evaluation of coracoacromial arch and correlation with 641
Rotator cuff tears, diagnosis of partial and complete, using combined gradient echo and spin echo imaging 541
Rotatory palmar subluxation of the lunate in post-traumatic ulnar carpal translocation 103

Sacroiliitis, septic, MRI of 289
Sarcoidosis, osseous, leptomeningeal and spinal-pelvic (*case report 825*) 297
Sarcoidosis, solitary muscular: CT, MRI and scintigraphic characteristics 293
Sarcoma, synovial, monophasic type (*case report 871*) 589
Scapula, grating, value of computed tomography in the diagnosis of 357
Schneckenbecken dysplasia, possibly a new variant (*case report 870*) 586
Schwannoma, 'ancient' (degenerated neurilemoma) (*case report 872*) 593
Sclerosis, noninflammatory, of the sternal end of the clavicle: a follow-up study and review of the literature 373
Scoliosis, clinical use of the simple 3D-calculation in 43
Scoliosis, variation in Cobb angle measurement in 517
Segond fracture, healed: a characteristic residual bone excrescence 555
Septic sacroiliitis, MRI of 289
Shoulder: coracoacromial arch: MR evaluation and correlation with rotator cuff pathology 641
Shoulder: coraco-clavicular joint: normal variant in humans. A radiographic demonstration in the human and non-human primate 117
Shoulder: diagnosis of partial and complete rotator cuff tears using combined gradient echo and spin echo imaging 541
Shoulder, MRI of, isolated subacromial bursal fluid in symptomatic patients on: correlation with arthroscopic findings 529
Skeletal cystic angiomatosis (*case report 841*) 303
Soft tissue, fluid-fluid levels in cavernous hemangioma of 107
Soft tissue hemangiomas: MR manifestations in 23 patients 621
Soft tissue masses, benign, of the wrist and hand: MRI appearances 327
Soft tissue, MRI of malignant fibrous histiocytoma of: analysis of 13 cases with pathologic correlation 271
Solitary congenital or infantile (desmoid-type) fibromatosis of the proximal end of the tibia (*case report 832*) 381
Solitary muscular sarcoidosis: CT, MRI and scintigraphic characteristics 293
Spine: chondrosarcoma of the spinous process (*case report 879*) 677
Spine: congenital bilateral spondylolysis and spondylolisthesis of the fourth cervical vertebra (*case report 868*) 580
Spine: ossification of the posterior longitudinal ligament: a report of 9 cases in non-Oriental patients 601
Spine: role of technetium-99m planar bone scanning in the evaluation of low back pain 91
Spondyloepi(meta)physeal dysplasia, a new variety of the autosomal dominant type. Handigodu disease: a radiological study 611
Spondylolisthesis and spondylolysis, congenital bilateral, of the fourth cervical vertebra (*case report 868*) 580
Spondylolysis and spondylolisthesis, congenital bilateral, of the fourth cervical vertebra (*case report 868*) 580
Standards for ultrasonographic measurements of the hip joint in Indian adults 111
Subacromial bursal fluid, isolated, on MRI of the shoulder in symptomatic patients: correlation with arthroscopic findings 529
Subluxation, rotatory palmar, of the lunate in post-traumatic ulnar carpal translocation 103
Supraorbital osteoblastoma (*case report 874*) 656
Symphalangism, hereditary, with carpal and tarsal fusions and deafness (*case report 857*) 468
Synovial chondromatosis, giant solitary 23
Synovial chondromatosis simulating neoplastic degeneration of osteochondroma: findings on MRI and CT 99
Synovial sarcoma, densely calcifying, of the hip metastatic to the lungs (*case report 878*) 673
Synovial sarcoma, monophasic type (*case report 871*) 589
Synovial swelling of the elbow extending into the forearm and causing compression of the underlying ulna (*case report 855*) 462

Technetium-99m planar bone scanning, role of, in the evaluation of low back pain 91
Tendon, Achilles, ossification of: imaging abnormalities in 12 patients 127
Tetanus, hyperostosis and osteoarthritis in patients surviving after 31
The value of computed tomography in the diagnosis of grating scapula 357
Tibia vara and focal fibrocartilaginous dysplasia: a case report 333
Tibial collateral ligament injury, MRI of: comparison with clinical examination 521
Tuberculosis presenting as a soft tissue forearm mass in a patient with a negative tuberculin skin test (*case report 824*) 79
Tumor, pseudomalignant osseous, of the hand, MRI of 513
Tumors, benign fatty, in children, MR imaging of: report of four cases and review of the literature 361
Tumors, bone, benign and malignant, MR imaging of edema accompanying 261

Ultrasonographic evaluation of wrist ganglia 201
Ultrasonographic measurement, direct, of femoral anteversion in newborns 133
Ultrasonographic measurements of the hip joint in Indian adults, standards for 111
Uncemented hip components, value of contrast arthrography in assessing loosening of symptomatic 37
Unusual radiological features in Paget's disease of bone 257

Value of contrast arthrography in assessing loosening of symptomatic uncemented total hip components 37
Value of coronal plane in MRI of internal derangement of the knee 211
Variation in Cobb angle measurement in scoliosis 517
Varicella syndrome, congenital (*case report 846*) 321
Verbum sapienti 270
Vertebral pedicle diameter as determined by computed tomography: inaccuracies observed by direct measurement of cadaveric lumbar spine 551
Vertebral pseudarthrosis associated with diffuse idiopathic skeletal hyperostosis 353

Wrist ganglia, ultrasonographic evaluation of 201
